

ADHEFILM®

ADHESIVE PROTECTION FILMS

Protection of wings

Optimized range to provide protection for a multitude of **interior/exterior surfaces**

Customized pre-cutting

Easy to apply and remove
"no residue from adhesive"

Elimination of non-quality **costs**

Qualification FAR25-853

ADHETEC has been specializing in adhesive films for 20 years and supplies aeronautical manufacturers and maintenance centers

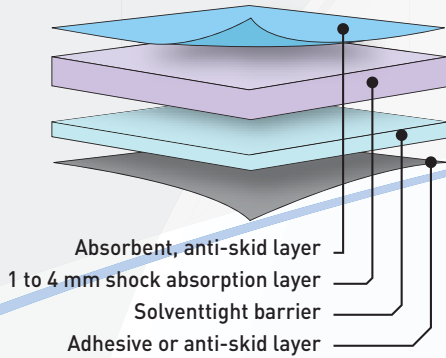

A modular system defined according to the need for protection (scratches, dust, light shocks, tools dropped, moving of equipment, etc.) with an adhesive system suited to the surface.

solutions adhésives

ADHEFILM®

ADHESIVE FILMS FOR TEMPORARY PROTECTION

A range of solutions to match your exact needs:

	Material code	Product description	Application	Thickness
Primary part protection	527	Extremely flexible protective cloth tape , easy to implement. Thick fabric with removable rubber PSA.	For smooth and lacquered surfaces. Adherence to many surfaces without risk of glue residue.	0.25 mm
	528	Thick 3-layer cloth tape with removable acrylic adhesive. Easy to implement, leaves no residue.	Temporary protection during manufacturing against shocks, oil and solvents. Solvent-proof system against runoffs and infiltrations. Can be walked on.	0.3 mm
	862	Flexible polyurethane film. Easy to remove, leaves no residue. Can be re-positioned.	Protection of specific surfaces such as polished metal, composites, aluminium , etc. Protection against abrasion.	0.25 mm
Assembly phase protection	T415	Thick non-skid semi-rigid polypropylene plates , delivered in easy-to-handle folded pre-cut kit. Adhesive-free, held by contact. Can be used in several manufacturing cycles.	For very fragile surfaces such as carbon panels. Protects the floor against shocks and impacts from trolleys, tools, ladders...	1.2 mm
	T409	Thick semi-rigid polycarbonate and foam plates , delivered in easy-to-handle folded pre-cut kit. Adhesive-free, held by contact. Can be used in several manufacturing cycles.	Protection against shocks of very fragile surfaces.	4.5 mm
	304	Thick white PP film with anti-skid properties and removable acrylic adhesive.	Temporary protection against shocks of fragile and shiny surfaces (galley areas, furniture, seats, NTF, panels...).	0.2 mm
Final phase protection	305 series	Protective polyethylene foam. Removable acrylic adhesive. 3 levels of adhesiveness.	Protects a wide range of surfaces, from grained to smooth finishes (galleys, bins, etc.).	from 2 mm up to 8 mm
	409 455	PE film with removable rubber adhesive.	For textiles and carpets. Ideal product to protect textile and/or highly textured surfaces such as acrylic fibres, polypropylene, polyamide, polyester-based carpets.	0.1 mm
	445	PE film with removable rubber adhesive. Low level of adhesiveness.	Protection of fragile and smooth surfaces such as PMMA, lacquered woods, painted parts.	0.05 mm
	423	PE film with removable rubber adhesive.	Protection of lacquered surfaces against dust and scratches. Resists to outdoor conditions. Temporary masking of liveries (Airbus certification).	0.08 mm
